## The FantasyDrafthelp.com Draft Philosophy: You Win By Obtaining Value With Every Pick!

We at FantasyDrafthelp.com always emphasize the wisdom of our VIP approach to drafting: information and process lead to value. Of course, value is the single most important component of drafting or auctions. Even in the fantasy industry, this point is often overlooked.

In most cases, titles are won by patiently accruing value throughout a draft or auction. During the Information stage, fantasy owners compile information about players at individual positions. Process involves comparison of players across positions.

We put a tremendous amount of hard work into our draft board, and you do as well. As such, you need to trust the fruits of these labors and adhere to your draft board as much as possible. The surest way to be able to extract maximum value is to prepare extensively ahead of time and then refrain from jumping around on the board on Draft Day. Approach the draft with an actuarial mindset, determined to squeeze maximum value out of every pick, and you will be poised for success.

### FantasyDrafthelp.com: A Value Provider

**There's only one place to go for:**

\* Coverage of major fantasy sports, and the widest array of niche sports.

\* An exclusive statistic that quantifies overall performance precisely.

\* Comprehensive broadcasts on fantasy sports and other subjects.

**There's only one place to go for the industry-changing DVD, REAL SUCCESS AT FANTASY SPORTS: FantasyDrafthelp.com.**

### Draft Board Decoder

The FantasyDrafthelp.com draft board contains all the relevant information you need right at your fingertips.

\* Players are color-coded by their value by round in a 10-team draft. 1st round is gold, 2nd round silver, 3rd round bronze, 4th round orange and 5th round light blue.

\* The "Stat" column shows how each player performed on our standard deviation from the mean statistic in 2006-07 (stat details on Page 5).

\* Relevant 2006-07 statistical categories are listed, along with the number of games played and rankings in the aforementioned "Stat" category and the "Experts Draft Board" which is listed under "Exp." This is the composite ranking for each player arrived at by averaging out the draft boards of other leading fantasy hoops publications and websites.

## Don't Be That Guy!

^ Don't disregard value and end up reaching for players. Actually, this advice is always valid in any sport, but it can't be said often enough. One example of this can be seen directly to the left of this article. Stoudemire would be considered to be a better bet than Chandler by most fans, but the "Stat" number shows that Chandler has been a superior all-around value and thus Stoudemire would be a reach over Chandler.

^ Don't gamble excessively on a talented but hurt player like Elton Brand. The absolute best-case scenario is that he would come back in time to help at the end of your stretch run. You probably shouldn't take him at all, but if you do, make it late.

^ Don't "punt" categories in a rotisserie league. You must try to be competitive in all areas in order to win.

^ Don't assemble too many injury question marks.

## Suggested Hoops League Guidelines

We recommend that you hold your auction or serpentine-style draft with 10 owners, selecting 12 players (4 guards, 4 forwards, 2 centers). In case of an auction, use a financial system that allots an average of \$11 per player.

Our preferred style of play is head-to-head rotisserie, in which teams compete on a week-to-week head-up basis. Recommended categories are points, rebounds,

assists, steals, blocks, 3-pointers, 3-point percentage, field goal percentage, free throw percentage and least turnovers. First place in each category would yield 10 points, second place 9 points, etc.

A rotating tiebreaker category should be utilized in the case of a 5-5 category tie. The starting lineup should consist of 2 guards, 2 forwards and 1 center.

# 2007 Fantasy Overview

^ KG is the ultimate fantasy power this season, not LeBron. Check his "Stat" number from last year (details below on the stat) and factor in the worlds of synergy he'll have with Allen and Pierce.

^ For that matter, Dirk in Dallas still puts up sufficient all-around numbers to rate ahead of "King James."

^ Underrated top centers: Camby (less so than last year, but still not fully appreciated) and Biedrins. They're both legit starters.

^ There are very few worthy #2 forwards (only 2). There are a huge number of worthy #3 forwards, however (18). Overall, the crop of top guards is thinner than the forwards and consequently, they are rated proportionally higher.

## Overvalued/Undervalued

NOTE: Players are deemed overvalued or undervalued based on their rankings on our draft board versus their placement on the "experts' draft board," which is a compilation of other leading fantasy hoops magazines and websites.

**Overvalued** — **Guards:** Billups, Ford, Hinrich, S. Jackson, A. Miller. **Forwards:** Boozer, Granger, Josh Howard, Maggette, Odom, Prince, Josh Smith. **Centers:** Bogut, Curry, B. Miller, B. Wallace

**Undervalued** — **Guards:** Barbosa, Ginobili, T. Parker, Roy. **Forwards:** Artest, David West. **Center:** S. O'Neal

## Stat Category Overview

Our "Stat" category on our draft board calculates the standard deviation from the mean in all hitting categories and all pitching categories. In simple English, imagine a spectrum going across from left to right, with negative numbers on the left side, a "zero" in the middle and positive numbers on the right side.

We utilize this statistic for football, baseball, basketball, hockey and NASCAR as well as hoops. For hoops, we use all of the standard fantasy categories listed on the draft board to factor in for this statistical compilation.

A player's performance in each category is plotted on one of these spectrums, with the most valuable players putting up most of their numbers on the most of their numbers on the positive side. Then, we add up the totals of every category, positive and negative. By using this tool, we can identify not merely how they performed, but how valuable their performances were in each category. Truly, this statistic serves as the ultimate baseline for the previous season's production.
