# FANTASY HOOPS DRAFTOLOGY 2019

A collective presentation of: FANTASYDRAFTHELP.COM. **GRIDIRON & HARDWOOD, THE** FDH LOUNGE, THAT **NBA LOTTERY PICK &** SPORTSOLOGY under the banner of THE 21<sup>ST</sup> **CENTURY MEDIA ALLIANCE** October 15, 2019 **RICK MORRIS/ BEN CHEW/ RUSS COHEN/JASON JONES** 

# **Draft Board Decoder**

The FantasyDrafthelp.com draft board contains all the relevant information you need right at your fingertips.

\* Players are color-coded by their value by round in a 10-team draft. 1st round is gold, 2<sup>nd</sup> round silver, 3rd round bronze, 4th round orange and 5th round light blue.

\* The "Stat" column shows how each player performed on our standard deviation from the mean statistic in 2019-20 (stat details on Page 2).

\* Relevant 2019-20 statistical categories are listed, along with rankings for each, the number of games played and rankings in the aforementioned "Stat" category.

## Pullins Law Firm LLC: PullinsLaw.com

Scott Pullins: "I have spent my career, both as an attorney, and otherwise, in roles where I help people break down and solve complex problems. After a consultation, you will be put on the path toward resolution of your issue. I will either recommend that you retain me to resolve your issue, I will recommend a trusted colleague, or I will offer some other solution, sometimes even free or at a lower cost than a private attorney, in order to assist you."

Evaluating Production Across a Spectrum: Lessons of our Proprietary Ultimate Quantitative Baseline Stat

Our "UQB" category (Ultimate Quantitative Baseline) on our draft board calculates the standard deviation from the mean in all relevant hockey categories. In simple English, imagine a spectrum going across from left to right, with negative numbers on the left side, a "zero" in the middle and positive numbers on the right.

We utilize this statistic for football, baseball, basketball, hockey and NASCAR as well as hoops. For hockey, we use all of the standard fantasy categories listed on the draft board to factor in for this statistical compilation. A player's performance in each category is plotted on one of these spectrums, with the most valuable players putting up most of their numbers on the most of their numbers on the positive side. Then, we add up the totals of every category, positive and negative. By using this tool, we can identify not merely how they performed, but how valuable their performances were in each category. Truly, this statistic serves as the ultimate baseline for the previous season's production.

24T ^ The top tier at forward is far more shallow than guard, but the second tier is incredibly deep, far more so than quard. It's about the same depth through three tiers and then the fourth tier is deeper at forwards again. ^ Just like last year, more than half of the owners (seven) in a 10-team league will end up with a top-flight center, assuming each takes one of them. Clint Capela is essentially a one-man second-tier, so prepare for a big dropoff after him.

#### **Don't Be That Guy**

^ Don't sleep on stat-sheet fillers who aren't as wellpublicized as some of the megastars. Examples include Gorgui Jieng, Patrick Beverley and Robert Covington.

^ Don't show up unprepared to deal with the specificities of your league's scoring system. Be prepared on all of the details.

^ Don't "punt" categories in a rotisserie league. You must try to be competitive in all areas in order to win.

^ Don't assemble too many injury question marks.

#### **Suggested League Guidelines**

We recommend that you hold your auction or serpentine-style draft with 10 owners, selecting 12 players (4 guards, 4 forwards, 2 centers). In case of an auction, use a financial system that allots an average of \$11 per player.

Our preferred style of play is head-to-head rotisserie. in which teams compete on a week-to-week head-up basis. Recommended categories are points, rebounds, assists. steals, blocks, 3-pointers, 3point percentage, field goal percentage, free throw percentage and least turnovers. First place in each category would yield 10 points, second place 9 points, etc. A rotating tiebreaker category

should be utilized in the case of a 5-5 category tie. The starting lineup should consist of 2 guards, 2 forwards and 1 center.

#### **College Hoops Fantasy Team Game Suggested Guidelines & Draft Board**

^ A standard serpentine-style draft serves as the best place to begin.

<sup>^</sup> The ideal distribution of talent would be as follows: 5 teams drafted by 8 owners, 6 teams drafted by 7 owners, 7 teams drafted by 6 owners or 8 teams drafted by 5 owners.

^ Points should be divided equally between success in the regular season/conference tournaments and in the NCAA tournament.

<sup>^</sup> Regular season point distribution should come in the form of a "snapshot" of the Associated Press Top 25 poll on the following dates: December 2, January 6, January 20, February 3, February 17 and March 3. On those dates, points would be allocated in the following manner: 1st place (100 points), 2nd place (94 points), 3rd place (91 points), 4th place (88 points), 5th place (85 points), 6th place (78 points), 7th place (75 points), 8th place (72 points), 9th place (68 points), 10th place (65 points), 11th place (58 points), 12th place (55 points), 13th place (52 points), 14th place (48 points), 15th place (45 points), 16th place (40 points), 17th place (36 points), 18th place (32 points), 19th place (28 points), 20th place (25 points), 21th place (22 points), 22nd place (18 points), 23rd place (15 points), 24th place (12 points), 25th place (10 points). Additionally, 90 points are to be awarded to the winner of a regular season conference title and an additional 90 points to the winner of a conference title tournament.

<sup>^</sup> The other half of the points, in the form of NCAA tournament points, are to be distributed as follows: 50 points for qualifying for the tournament, 100 points for one of your teams qualifying as a #1, #2, #3, #4 seed in any region, 40 points for qualifying as a #5, #6, #7 or #8 seed in any region, 40 points for winning a first-round tournament game, 75 points for winning a second-round tournament game, 150 points for winning a third-round tournament game, 175 for winning a regional final game, 250 points for winning a national semifinal game and 500 points for winning the national title.

^ NOTE: The number in the "Rank" category is the team's average in a composite of major poll rankings.

**ROUND 1:** Nobody really went off the board here.

**ROUND 2**: Irving dropping to Rick was nice value. Ben reached may have reached slightly for Butler, but then Nate said "Hold my beer!"

**ROUND 3**: Well, nobody's going to have better length than Samm! Mike P and Russ picked up good value.

**ROUND 4**: With Luca and Lebron, Jason's going to have wide-ranging production at some key positions.

ROUND 5: Jeff might have tallied the value of the draft in taking Drummond here.

**ROUND 6**: Indicative of a fairly tight draft, Nate nabbed the final player in the FDH Top 50 Overall at the end of the round.

**ROUND 7**: Jordan could end up as a steal for Dave here.

ROUNDS 8-12: Sexton, Horford and Barnes were all high-upside picks.

### Media Narratives Whiff on Cavs (Again!)

#### By Rick Morris/The FDH Lounge

Ever since drafting the one and only Lebron James in the 2003 NBA Draft, the team that I've rooted for my whole life, the Cleveland Cavaliers, has been a magnet for media hot takes and false narratives. The best example of this phenomenon occurred in Lebron's second C-Town stint, when the team won four consecutive Eastern Conference Crowns and an NBA Title and was completely buried by the media midseason in each of the four campaigns. I've written copiously about the Cavs in this spot many times over the years because I've been provided plenty of material by the media's shoddy (and shady) approach to covering them.

Admittedly, as a lifelong fan rooting for the "one year, take a knee" scenario that yielded Tim Duncan to the Spurs and Andrew Luck to the Colts, I was devastated

by the team falling out of the top three in the 2019 lottery in a draft with only three "sure things." And yet, the way that everything panned out may have put the Cavs as the second-biggest winner in the draft, only behind their great former GM David Griffin and his Pelicans with the Big Z.

Start with Darius Garland, a smooth second-generation star who does many of the same things as last year's gem in the draft, Collin Sexton, but does many of them just a bit better. Sure, it's hard to pick against Sexton as a pure penetrator, but Garland is a more natural point guard and, as much as Sexton was a pleasant surprise in terms of his outside shooting (albeit a mild one, as he wasn't terrible at Alabama), Garland could be one of the league's better perimeter shooters even in his rookie season. Yes, this is an undersized backcourt, even more so than Portland's, but it's arguably as potentially explosive as theirs is.

And while the story of the draft is not complete without mentioning small-school stalwart Dylan Windler, whose shooting and rebounding could make him a nice part of the nucleus for a long time – along with other improving talents like Cedi Osman and Larry Nance, Jr. – the true second-half of the 1-2 punch in the draft is Kevin Porter, Jr. A supremely talented combo guard who has modeled his game after James Harden – earning himself, however

jokingly, the "Baby Harden" nickname from FDH Lounge Dignitary Ben Chew – this do-it-all wing completes one of the most skilled young scoring trios in the league along with Sexton and Garland. And although he was projected in the backcourt by many teams – and his defensive wingspan would be truly elite at the 2 – he's big enough to play the 3 and get on the court at the same time with his scoring and playmaking brethren.

Combine these fine pieces of clay with the coaching acumen of John Beilein, an incredible teacher who's had success at every level he's ever been at – and is willing to implement a system that puts all three of his young studs on the floor at the same time, similar to formations that he once used as Michigan – and you've got the keys to not just success, but potentially huge success in the medium term. While some of the young assistants that the Cavs interviewed for their head coaching job were very intriguing to me – not least of whom Jordi Fernandez, their former Canton Charge coach and a key assistant on the best team in the league at elevating young talent, Denver – it's tough to imagine a first-time head coach coming in and implementing a daring, high-tempo system that utilizes all key

# **Correlation of Top Players to NBA Titles**

This list correlates to the rankings of present players on Page 12. Top-tier players are defined as those very few capable of winning a championship without a fellow super-elite player. The second tier represents players who were at an All-Star level at the time. Each year's champions are examined separately; for example, you will notice that Magic Johnson's star teammates were rated at different levels at different points of the 1980s dynasty. This list helps to go beyond the cliches about superstar players and their surrounding cast on championship teams to identify the specific dynamics most and least at play. It is interesting as well to study the anomalies on the list, the combinations of star players that have led to the least titles during these years.

#### Media Narratives Whiff on Cavs (Again!)

#### (CONTINUED FROM PAGE 12)

talents to their best abilities in the way that Beilein can. He's the right man in the right place at the right time, trying to change the paradigm in the same way that Steve Kerr did when he first took the Warriors job.

And those who try to change the paradigm often get slept on when they get their chance. Nobody in the pundit community foresaw Kerr elevating Golden State in the manner that he immediately did. Similarly, pundits are only viewing the Cavs in terms of the potential downside. Beilein is a longtime college coach in a league where that designation does not often lead to success - never mind, again, that he's a top teacher on a young team desperately in need of that skill set. Sexton was an analytics whipping boy last year - never mind that his subpar defense was in part a product of the garbage defense around him and that, as I anticipated, every facet of his game looked dramatically better at the end of the season when he was finally able to benefit from playing with Kevin Love. Garland was injured for almost all of last season - never mind that his game compares well with Ja Morant, a consensus top three player in the 2019 draft and that the big-time pick who came to the Cavs with a similar rap was Kyrie Irving. Porter, Jr. was suspended at USC and got the rap as a malcontent during a disappointing freshman season - never mind that him slipping all the way to the end of the round was a disproportionate rap for a player of his immense upside and that the right nurturing situation, which by all accounts he has found thus far in Cleveland, has a good chance of unleashing said ceiling.

The aforementioned Ben Chew indicates that 35 wins and even a playoff run could be in the offing this year – with the caveat that Love stays healthy all year long. I'm certainly more conservative at a 28-win projection, but even that modest prediction flies in the face of the national "LOL Cavs" narrative that mindlessly and cynically forecasts endless misery with this roster.

Personally, this is an odd posture for me, as I'm almost always (slightly) more bearish on the prospects of Cleveland franchises than the popular consensus, but I'm legitimately baffled as to why the talent injection in the last two drafts is so completely slept on by so many. Certainly, there's an assumption that the pieces will never fit together, and there's no complete assurance that they will, but again, the negative air is definitely disproportionate to the reality. It's likely that some of the nice complementary parts that exist presently that don't necessarily factor into future plans, such as Tristan Thompson, Jordan Clarkson, Brandon Knight, John Henson and perhaps even Matthew Dellavedova will be flipped for future considerations, but assuming that they hang onto Love for at least a year or two - which the smart money says they will do because of the positive effect that he's already had on Sexton's game and will likely have on Garland's and Porter's - and can keep Osman, Nance and Windler healthy, then you've already got seven of your rotation players right there. Big man Ante Zizic is also somebody capable of tallying minutes at backup center, so that brings the potential number to eight.

At any rate, sleeping on the acquisition of big-time talent in the NBA is never a smart take. Granted, teams like the Sacramento Kings – between their early 2000s hot period and the last year – were garbage despite not lacking for high-ceiling talent because they weren't cohesive and the challenge for the Cavaliers will be to make the pieces fit. But, given the off-the-court work that's been done early, the assemblage of a coaching staff completely built around the culture of teaching and the willingness to implement an explosive-yet-daring system in an attempt to change the game, the Cavs are off to the kind of start to this era that they so desperately need.
