#### THE TOP 75 PLAYERS IN PRO BASKETBALL HISTORY

The NBA's 75th Anniversary has prompted a wave of Best-Of lists, but few with the substance to reinforce the selections. Authors Rick Morris, Ben Chew and Russ Cohen came together to create a list of the top 75 pro basketball players ever, with evidence to justify the placement of each -- as well as biographical details, comparisons of various legends, little-known-but-interesting tidbits, what-if scenarios and much more. Additionally, the book includes our year-by-year ranking of the top players in pro basketball and rosters for hypothetical "Olympic Dream Teams" had they existed prior to 1992. This is a book that is crafted for sports fans who are interested in learning more about the rich history of pro basketball. Available on Amazon.com

Scott Pullins: "I have spent my career, both as an attorney, and otherwise, in roles where I help people break down and solve complex problems. After a consultation, you will be put on the path toward resolution of your issue. I will either recommend that you retain me to resolve your issue, I will recommend a trusted colleague, or I will offer some other solution, sometimes even free or at a lower cost than a private attorney, in order to assist you."

#### Evaluating Production Across a Spectrum: Lessons of our Proprietary Ultimate Quantitative Baseline Stat

Our "UQB" category (Ultimate Quantitative Baseline) on our draft board calculates the standard deviation from the mean in all relevant hockey categories. In simple English, imagine a spectrum going across from left to right, with negative numbers on the left side, a "zero" in the middle and positive numbers on the right.

We utilize this statistic for football, baseball, basketball, hockey and NASCAR as well as hoops. For hockey, we use all of the standard fantasy categories listed on the draft board to factor in for this statistical compilation. A player's performance in each category is plotted on one of these spectrums, with the most valuable players putting up most of their numbers on the most of their numbers on the positive side. Then, we add up the totals of every category, positive and negative. By using this tool, we can identify not merely how they performed, but how valuable their performances were in each category. Truly, this statistic serves as the ultimate baseline for the previous season's production.

- ^ Don't sleep on stat-sheet fillers who aren't as wellpublicized as some of the megastars. Examples include Robert Williams, Herbert Jones and Robert Covington.
- ^ Don't show up unprepared to deal with the specificities of your league's scoring system. Be prepared on all of the details.
- ^ Don't "punt" categories in a rotisserie league. You must try to be competitive in all areas in order to win.
- ^ Don't assemble too many injury question marks.

#### **Suggested League Guidelines**

We recommend that you hold your auction or serpentine-style draft with 10 owners, selecting 12 players (4 guards, 4 forwards, 2 centers). In case of an auction, use a financial system that allots an average of \$11 per player.

Our preferred style of play is head-to-head rotisserie, in which teams compete on a week-to-week head-up basis. Recommended categories are points. rebounds, assists. steals, blocks, 3-pointers, 3point percentage, field goal percentage, free throw percentage and least turnovers. First place in each category would yield 10 points, second place 9 points, etc.

A rotating tiebreaker category should be utilized in the case of a 5-5 category tie. The starting lineup should consist of 2 guards, 2 forwards and 1 center.

#### College Hoops Fantasy Team Game Suggested Guidelines & Draft Board

- <sup>^</sup> A standard serpentine-style draft serves as the best place to begin.
- ^ The ideal distribution of talent would be as follows: 5 teams drafted by 8 owners, 6 teams drafted by 7 owners, 7 teams drafted by 6 owners or 8 teams drafted by 5 owners.
- ^ Points should be divided equally between success in the regular season/conference tournaments and in the NCAA tournament.
- ^ Regular season point distribution should come in the form of a "snapshot" of the Associated Press Top 25 poll on the following dates: January 1, January 15, January 29, February 12 and February 26. On those dates, points would be allocated in the following manner: 1st place (100 points), 2nd place (94 points), 3rd place (91 points), 4th place (88 points), 5th place (85 points), 6th place (78 points), 7th place (75 points), 8th place (72 points), 9th place (68 points), 10th place (65 points), 11th place (58 points), 12th place (55 points), 13th place (52 points), 14th place (48 points), 15th place (45 points), 16th place (40 points), 17th place (36 points), 18th place (32 points), 19th place (28 points), 20th place (25 points), 21th place (22 points), 22nd place (18 points), 23rd place (15 points), 24th place (12 points), 25th place (10 points). Additionally, 90 points are to be awarded to the winner of a regular season conference title and an additional 90 points to the winner of a conference title tournament.
- ^ The other half of the points, in the form of NCAA tournament points, are to be distributed as follows: 50 points for qualifying for the tournament, 100 points for one of your teams qualifying as a #1, #2, #3, #4 seed in any region, 40 points for qualifying as a #5, #6, #7 or #8 seed in any region, 40 points for winning a first-round tournament game, 75 points for winning a second-round tournament game, 150 points for winning a third-round tournament game, 175 for winning a regional final game, 250 points for winning a national semifinal game and 500 points for winning the national title.

### The Crossover In Eras Is Ending

By Rick Morris/The FDH Lounge

THE WAY WE ALL BECAME THE BRADY BUNCH TV reviewer Kimberly Potts examines how this short-lived show became a cultural phenomenon.

Available on Amazon.com

19 Two years ago in this space, we noted that the NBA was going through a period of a bit more parity at the top than we're used to

seeing. Of course, the bar is low for that statement since the league usually features a narrow band of contenders at the top, but it was wider than usual. Heading into the 2023-24 season, we're seeing a decided return to normalcy.

In terms of teams representing the era of the 2010s, there were of course Golden State, Boston and Toronto in that mix – as well as the Lakers (by dint of having LeBron James) and Brooklyn (by dint of having their superteam for their approximate 15 minutes of relevance). Teams that we listed as being on the way up included Phoenix, Atlanta, New York, Denver, Memphis, Milwaukee, Dallas and Utah. Phoenix transitioned to a bit of a team from the holdover era by adding Kevin Durant to the mix, but they took their best shot at Denver and came up short, as did the Lakers - and Golden State didn't even get past LA, so the previous era is largely running on fumes all of a sudden. Toronto has already fallen apart and Boston indicated over the past two postseasons that they've capped out at "almost there."

In terms of the up-and-coming teams that we listed two years ago, Atlanta fell off hard, New York fell off but came back (but still looks to be at least one more impact player away from true contention), Denver became the Monster in the Rocky Mountains, Memphis is only as good as the faltering mental health of their best player, Dallas has fallen backwards and Utah moved to full-on rebuilding. So we're substantially thinned-out at the top. Philly and Miami were mentioned in passing two years ago and both of them are close to true contention, but still missing an element or two.

However, in the ever-evolving ecosystem of the Association, some teams that were not mentioned two years ago loom as some of the strongest contenders over the next half-decade: Cleveland (notwithstanding their disappointing playoff flameout this past spring), Sacramento (after their incredible come-up in '22-23), Oklahoma City (now decidedly on the way out of their rebuild) and San Antonio (as Big Vic leads a very expedited return to glory).

THE TOP 75 PLAYERS IN PRO BASKETBALL HISTORY The NBA's 75th Anniversary has prompted a wave of Best-Of lists, but few with the substance to reinforce the selections, Authors Rick Morris, Ben Chew and Russ Cohen came together to create a list of the top 75 pro basketball players ever, with evidence to justify the placement of each -- as well as biographical details, comparisons of various legends, little-known-butinteresting tidbits, what-if scenarios and much more. Additionally, the book includes our year-by-year ranking of the top players in pro basketball and rosters for hypothetical "Olympic Dream Teams" had they existed prior to 1992. This is a book that is crafted for sports fans who are interested in learning more about the rich history of pro basketball. Available on Amazon.com

#### THE TOP 75 PLAYERS IN PRO BASKETBALL HISTORY

The NBA's 75th Anniversary has prompted a wave of Best-Of lists, but few with the substance to reinforce the selections. Authors Rick Morris, Ben Chew and Russ Cohen came together to create a list of the top 75 pro basketball players ever, with evidence to justify the placement of each -- as well as biographical details, comparisons of various legends, little-known-but-interesting tidbits, what-if scenarios and much more. Additionally, the book includes our year-byyear ranking of the top players in pro basketball and rosters for hypothetical "Olympic Dream Teams" had they existed prior to 1992. This is a book that is crafted for sports fans who are interested in learning more about the rich history of pro basketball. Available on Amazon.com

#### **Γop 10 For The Next 10**

The FDH Top 10 for the Next 10 is a list attempting to identify the best players in the league -- not necessarily in a pure fantasy sense -- over the course of the entire next decade. It's not a pure 25-and-under draft, but it skews heavily in that direction because most big-time stars are past their primes in their late 30s. Players who are both very young and very skilled already have the biggest edges.
