THE TOP 75 PLAYERS IN PRO BASKETBALL HISTORY

The NBA's 75th Anniversary has prompted a wave of Best-Of lists, but few with the substance to reinforce the selections. Authors Rick Morris, Ben Chew and Russ Cohen came together to create a list of the top 75 pro basketball players ever, with evidence to justify the placement of each -- as well as biographical details. comparisons of various legends, little-known-but-interesting tidbits, what-if scenarios and much more. Additionally, the book includes our year-by-year ranking of the top players in pro basketball and rosters for hypothetical "Olympic Dream Teams" had they existed prior to 1992. This is a book that is crafted for sports fans who are interested in learning more about the rich history of pro basketball. Available on Amazon.com

Pullins Law Firm LLC: PullinsLaw.com

Scott Pullins: "I have spent my career, both as an attorney, and otherwise, in roles where I help people break down and solve complex problems. After a consultation, you will be put on the path toward resolution of your issue. I will either recommend that you retain me to resolve your issue, I will recommend a trusted colleague, or I will offer some other solution, sometimes even free or at a lower cost than a private attorney, in order to assist you."

Evaluating Production Across a Spectrum: Lessons of our Proprietary Ultimate Quantitative Baseline Stat

Our "UQB" category (Ultimate Quantitative Baseline) on our draft board calculates the standard deviation from the mean in all relevant hockey categories. In simple English, imagine a spectrum going across from left to right, with negative numbers on the left side, a "zero" in the middle and positive numbers on the right.

We utilize this statistic for football, baseball, basketball, hockey and NASCAR as well as hoops. For hockey, we use all of the standard fantasy categories listed on the draft board to factor in for this statistical compilation. A player's performance in each category is plotted on one of these spectrums, with the most valuable players putting up most of their numbers on the most of their numbers on the positive side. Then, we add up the totals of every positive category, and negative. By using this tool, we can identify not merely how they performed, but how valuable their performances were in each category. Truly, this statistic serves as the ultimate baseline for the previous season's production.

Don't Be That Guy

- ^ Don't sleep on stat-sheet fillers who aren't as wellpublicized as some of the megastars. Examples include Obi Toppin, Herbert Jones and Tyus Jones.
- ^ Don't show up unprepared to deal with the specificities of your league's scoring system. Be prepared on all of the details.
- ^ Don't "punt" categories in a rotisserie league. You must try to be competitive in all areas in order to win.
- ^ Don't assemble too many injury question marks.

Suggested League Guidelines

We recommend that you hold your auction or serpentine-style draft with 10 owners, selecting 12 players (4 guards, 4 forwards, 2 centers). In case of an auction, use a financial system that allots an average of \$11 per player.

Our preferred style of play is head-to-head rotisserie, in which teams compete on a week-to-week head-up basis. Recommended categories are points, rebounds, assists, steals, blocks, 3-pointers, 3point percentage, field goal percentage, free throw percentage and least turnovers. First place in each category would yield 10 points, second place 9 points, etc.

A rotating tiebreaker category should be utilized in the case of a 5-5 category tie. The starting lineup should consist of 2 guards, 2 forwards and 1 center.

College Hoops Fantasy Team Game Suggested Guidelines & Draft Board

- ^ A standard serpentine-style draft serves as the best place to begin.
- ^ The ideal distribution of talent would be as follows: 5 teams drafted by 8 owners, 6 teams drafted by 7 owners, 7 teams drafted by 6 owners or 8 teams drafted by 5 owners.
- ^ Points should be divided equally between success in the regular season/conference tournaments and in the NCAA tournament.
- ^ Regular season point distribution should come in the form of a "snapshot" of the Associated Press Top 25 poll on the following dates: January 5, January 19, February 2, February 16 and March 2. On those dates, points would be allocated in the following manner: 1st place (100 points), 2nd place (94 points), 3rd place (91 points), 4th place (88 points), 5th place (85 points), 6th place (78 points), 7th place (75 points), 8th place (72 points), 9th place (68 points), 10th place (65 points), 11th place (58 points), 12th place (55 points), 13th place (52 points), 14th place (48 points), 15th place (45 points), 16th place (40 points), 17th place (36 points), 18th place (32 points), 19th place (28 points), 20th place (25 points), 21th place (22 points), 22nd place (18 points), 23rd place (15 points), 24th place (12 points), 25th place (10 points). Additionally, 90 points are to be awarded to the winner of a regular season conference title and an additional 90 points to the winner of a conference title tournament.
- ^ The other half of the points, in the form of NCAA tournament points, are to be distributed as follows: 50 points for qualifying for the tournament, 100 points for one of your teams qualifying as a #1, #2, #3, #4 seed in any region, 40 points for qualifying as a #5, #6, #7 or #8 seed in any region, 40 points for winning a first-round tournament game, 75 points for winning a second-round tournament game, 150 points for winning a third-round tournament game, 175 for winning a regional final game, 250 points for winning a national semifinal game and 500 points for winning the national title.
